

Challenge Our Products

Strong, reliable products to maintain and care for all types of leather goods.

I just wanted to write you a note about **Leather Therapy** products. I was the head animal wrangler on the HBO mini-series, **JOHN ADAMS**, which is now playing. If you've been watching, you've seen that we filmed in rain, snow, sleet and even sunshine. When we started filming the show in January of 2007, I had all of the saddles cleaned and conditioned with the **Leather Therapy** products. We then used our tack in every kind of weather condition, doing nothing but wiping them off for the next 6 months. At the end of the show the saddles were put up in my saddle barn where they are stored.

I went up yesterday to inspect them and there is no drying out, mold or mildew on the saddles. Other than being a little dusty, they look just like they did a year ago. I keep trying to challenge your products, but continue to be amazed at how easy they are to use, how long they continue to work and how little you need to treat the leather. We used less than a quart to treat some 20 saddles, bridles and harness. I wish everything dealing with horses was as good and simple to use as **Leather Therapy!**

Sincerely,
Doug Sloan
